RISK OF FOREX TRADING

Trading in foreign exchange is speculative and may involve the loss of principal; therefore, assets placed under management should be risk capital funds that if lost will not significantly affect one's personal financial well-being. This is not a solicitation to invest and you should carefully consider your financial situation as to the suitability to your situation prior to making any investment or entering any transaction.

PAST PERFORMANCE

Past performance is not indicative of future results, as returns may vary according to market conditions.

WE DO NOT OFFER ANY ADVICE AND WISH YOU TO READ THIS DOCUMENT CAREFULLY BEFORE ENTERING OUR SITE

Using a Forex Managed Account, where professionals from DARSAL are trading on your behalf, you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all your initial investment and therefore you should not invest from which nothing cannot afford to lose. You should be aware of all the risks associated with alternative investments and seek advice from an independent financial advisor if you have any doubts or concerns. The risk of loss in trading alternative investments including commodities, futures, and foreign exchange, can be substantial. You should therefore carefully consider whether such trading is suitable for you considering your financial condition. The high degree of leverage that is often obtainable in alternative investments including commodities, futures, and foreign exchange, can work against you as well as for you. The use of leverage can quickly lead to large losses as well as large gains. One must always understand that there is always a relationship between high reward and high risk. Any type of market or trade speculation that can yield an unusually high return on investment is also subject to unusually high risk. Only funds you can afford to lose should be placed at risk and anyone who does not have such funds should not participate in alternative investments including commodities, futures, and foreign exchange. No representation is being made that any account will or is likely to achieve profits or losses like those discussed on this website. The past performance of any trading system or methodology is not necessarily indicative of future results.

You certify that you understand the content of this page. Alternative investments carry a high degree of risk and may not be suitable for all investors.
